

## HJR 64 -- Freedom of Choice in Health Care

Sponsor: Curtman

Upon voter approval, this constitutional amendment provides that no law can compel a person, employer, or health care provider to participate in any health care system nor prohibit a person or employer from paying directly for legal health care services. This resolution does not affect laws or regulations in effect as of January 1, 2010, affect which health care services a health care provider is required to perform, affect which health care services are permitted by law, or prohibit care provided under state workers' compensation.
